

CLINICAL TRAINING CALENDAR FOR 2020

COURSE NAME	LENGTH	TIMES	VENUE	PRICE	COURSE DESCRIPTION
FAMILY PARTNERSHIP TRAINING	5 days	8:45am – 3:30pm	NOBLE PARK	\$1550	The Family Partnership model has been widely implemented around the world and is the basis for many successful early intervention programs for families. The model assists practitioners to develop highly respectful relationships with parents. Participants are assisted to understand what it really means to work in partnership with families and reflect on their knowledge, skills and confidence.
KEYS TO CAREGIVING INTENSIVE	½ day	8:45AM– 1:00PM	NOBLE PARK	\$250	Keys to Caregiving Intensive covers the same framework as the full day course, however, delivery is more a lecture style rather conversational and pre-reading is required. This course is designed for participants with significant experience working with infants and young children.
PLAYSTEPS	1 day	8:45am – 4:30pm	NOBLE PARK	\$490	PlaySteps is a parent and child play-based program helping parents to strengthen their relationship and interactions with their child while learning practical parenting skills and building local support networks. This program is evidence-informed and has been proven to be an effective program.
NCAST - TEACHING	3 days	8:45am – 4:30pm	NOBLE PARK	\$1485	The Parent-Child Interaction (PCI) Teaching Scale is a widely used scale for measuring parent-child interaction. The scale contains a well-developed set of observable behaviours that describe the caregiver-child communication and interaction during a teaching situation, birth to 36 months of age. Teaching scores from interactions with children as young as 3 months of age show a signification correlation with subsequent measures of attachment, resilience and cognitive abilities.
NCAST - FEEDING	3 days	8:45am – 4:30pm	NOBLE PARK	\$1485	The aim of the Nursing Child Assessment Satellite Training (NCAST) is to give professionals, parents, and other caregivers the necessary knowledge and skills to provide nurturing environments for young children. The Parent-Child Interaction (PCI) Feeding Scale is a widely used scale for measuring parent-child interaction. The scale contains a well-developed set of observable behaviours that describe the caregiver-child communication and interaction during a feeding situation, birth to 12 months of age.
